

PRESS RELEASE

Paris, December 3, 2025

SFR Business partners with Cloud Temple to deploy a sovereign cloud in France

SFR Business, the 2nd French operator for businesses, is strengthening its position in the sovereign cloud market by partnering with Cloud Temple, a leading player in the sector. This strategic partnership allows SFR Business to offer services that comply with ANSSI requirements and are SecNumCloud-qualified, thereby meeting the highest security standards for the management of sensitive data.

A structuring alliance for the French digital ecosystem

This partnership marks a milestone in the construction of a French sovereign cloud industry, based on the complementary expertise of the two partners:

- **Cloud Temple** provides a sovereign infrastructure, located in France and SecNumCloud-qualified, guaranteeing the highest standards of security and compliance.
- **SFR Business** mobilizes all its assets at the national and regional level: a very high-speed connectivity infrastructure, cutting-edge cybersecurity solutions, and recognized expertise in supporting businesses throughout their digital transformation – from design to implementation, right through to operational exploitation.

A practical response to the challenges of sovereignty

Digital sovereignty and data security are now essential for businesses and public organizations. This collaboration provides concrete guarantees regarding the location, protection, and control of sensitive data, in line with the France 2030 plan and ANSSI recommendations.

It meets the expectations of public and private players in terms of digital sovereignty and affirms SFR Business's role as a trusted partner for businesses, public authorities, and vital operators.

"This partnership marks a decisive step forward: it finally makes large-scale access to a trusted cloud possible, based on high-level operational, legal and technical guarantees. This is a strategic step towards regaining our digital autonomy", says Sébastien Lescop, CEO of Cloud Temple.

"With this collaboration, we are responding to a growing demand from our customers for controlled cloud solutions, by offering a secure end-to-end offer at the national level, from the user to the processing of sensitive data", says Pierre Clément, Executive Vice President, Consumer and Enterprise Businesses, SFR.

About SFR Business - sfrbusiness.fr

SFR Business is the 2nd French operator for businesses.

As a leading convergent player, SFR Business uses its 30 years of expertise in telecoms and solutions integration to support the digital transformation of businesses and public bodies of all sizes. Thanks to the extent of its optic fiber and 4G/5G networks, its comprehensive portfolio of offerings and its local expertise throughout France, SFR Business is able to meet the most demanding requirements in terms of connectivity, cybersecurity, cloud, network infrastructure and contact centres. Its highest levels of certification, such as ISO 27001 and HDS (Health Data Hosting), guarantee a tailor-made response to all its customers' development projects. SFR Business is a supplier to the largest public sector accounts as well as most CAC40 companies. SFR Business is committed to a socially and environmentally responsible approach, which includes measures to optimise the energy consumption of SFR's network and data centres, as well as integrating security into its offerings to constantly adapt to new uses and risks of cyber-attacks.

About Cloud Temple - cloud-temple.com

Cloud Temple's ambition is to democratise the cloud for sensitive sectors, guaranteeing them optimal security without compromising on innovation. Placing artificial intelligence at the heart of its strategy, the company has been developing secure and high-performance cloud solutions since 2017 to support the transformation of the Industry, Finance, Health and Public sectors. To meet their challenges, Cloud Temple offers a complete cloud offer that complies with the most demanding standards in terms of reliability, security and data sovereignty, notably thanks to the SecNumCloud qualification awarded by ANSSI. Cloud Temple is also certified HDS (Health Data Hosting), and ISO 27001. All data processed is systematically hosted in datacenters in France.
